Your clients may already have some cyber-related coverages

If your clients have purchased their home and liability insurance with Chubb, they already have access to a wide array of cyber-related coverages, such as digital contents coverage, unauthorized charge reimbursement, lawsuit protection for unintentional online libel, and access to services that can help them resolve identity theft. But, by adding Cyber Protection coverage, you can help your client take their protection to the next level.

How does Masterpiece Cyber Protection compare?

Cyber coverage is a relatively new phenomenon in the Personal Lines market, so offering cyber is a great way to set you and Chubb apart. While a few other companies may cover cyber exposures, Chubb provides extras, such as psychiatric care, help in resolving cyber-related issues (not just reimbursement), and we cover professional services such as PR consultants, digital forensic analysts to aid in prosecution, cyber security consultants to help improve the client's security, and more. We are also the first to introduce Cyber disruption coverage. We can help your clients get things back to normal sooner.

Generate a quote today - just answer 2 simple questions!

Get a quote in just a few minutes by answering two simple questions on our Masterpiece Real-Time system. A screen will automatically ask about Cyber Protection coverage when you're quoting a home, so you'll be prompted to remember to add the protection. Coverage only needs to be added to one location, on one policy, as Cyber Protection offers worldwide coverage. The coverage can also be attached to a primary, secondary, or seasonal home, providing you with greater flexibility to offer this much-needed protection.

Please note: Dwelling policyholders insured through the Platinum Portfolio product will not have access to Cyber Protection at this time. However, you can obtain the coverage by moving the account to the Masterpiece platform, if you wish. Please be aware that the client will lose tenure credits, so you should weigh the pros and cons of this approach for each client.
